

Bona Commercial System™ Resilient Floor Finish

Bona Commercial System™ Resilient Floor Finish is a uniquely designed product for the treatment of resilient floors, offering a long lasting and extremely durable coating. It serves as long-term surface protection for heavy traffic in schools, healthcare facilities, retail spaces and commercial buildings, restoring the appearance and simplifying routine maintenance. It is also ideal for high-use and industrial areas where a high degree of chemical resistance is needed. Bona Commercial System Resilient Floor Finish is a waterborne, clear, non-yellowing formula.

- Waterborne, urethane-based protection for resilient floors
- Strong resistance to common disinfectants
- Ultra-quick drying for minimal downtime
- Optimal application and leveling properties
- Low slip potential and slip resistance
