

Working with planks 5" and wider?
Consider a **glue nail assist** using
Bona R850T Adhesive!

Bona R850T® Silane-Based Adhesive

Bona R850T® is a one-component, moisture curing, water and solvent-free, silane-based adhesive for wood floors. It provides outstanding adhesion to a variety of surfaces, and allows for the natural movement of wood flooring. Use along the leading edge of your prefinished or solid plank floor, coupled with staple or nail down system.

- Eliminates homeowners biggest complaint of wood floor creaking & popping
- Perfect for prefinished floors due to ease of cleanup days or even weeks later
- Specially designed for hardwood floors unlike the “jack of all trades” adhesives which can crystallize over time, not allowing for the wood’s natural movement
- Perfect alternative to face nailing close-out rows, board replacements, stairs, risers, and trim applications
- Excellent initial “green grab” means the flooring stays in place

Use with the Bona R850T Applicator Gun:

lightweight and comfortable • easy to operate • leaves no mess or waste when dispensing
