

Bona 8500 Red Aluminium Oxid Abrasives

Technical data sheet

Corundum based abrasives for high performance sanding of wooden floors. Particularly effective for removal of old coatings. Strong, rip-resistant backing suitable for belt sanding applications. Available in various sizes to fit most common machines equipped with standard drums or expansion drums.

- Coarse and medium sanding on hard- and softwood
- For demanding applications with belt and edge sanders
- Very long lasting
- Very high performance thanks to high stability
